

QUICKSTART

Instant starting aid with upper cylinder lubricant for all engines when starting is a problem in cold and damp weather. Contains upper cylinder lubricant.

APPLICATIONS

At low temperatures fuel might not vaporise sufficiently giving starting problems.

Spanjaard Quickstart is specially formulated to vaporise in cold and damp conditions, giving first time starting.

Spanjaard Quickstart can be used for starting all petrol, diesel and paraffin engines in cold and damp weather.

REPEATED STARTING ATTEMPTS GIVE

- Starter motor wear and battery discharge.
- Cylinder flooding and thus reduced chance of starting.
- Oil film wash away by the fuel.
- Fuel dilution of the crankcase oil.

Spanjaard Quickstart contains high vapour pressure hydrocarbons to give instant starting and dispersants to deal with any condensed water.

A special upper cylinder lubricant is also included to reduce wear before oil circulation begins.

A special inhibitor gives controlled burning of fuel instead of explosive and damaging pinking.

APPLICATION INSTRUCTIONS

Spanjaard Quickstart can be used on all petrol, diesel and paraffin engines, e.g. trucks, buses, tractors, earth-moving equipment, stationary engines, cars, outboard motors, lawnmowers, locomotives, 2-stroke engines, etc.

Petrol Engines - Do not choke or flood carburettor. Spray directly into air-intake for 2-3 seconds while ignition is off and engine is stationary. Start in normal manner.

Diesel and Paraffin Engines - Check fuel filter for wax blockage that might have crystallized out of the fuel due to sudden cold temperature.

Do not use heater plugs. Spray directly into air-intake for 2-3 seconds. Start engine in normal manner.

HANDLING AND STORAGE

CAUTION: Extremely flammable aerosol. Pressurised container: protect from sunlight and do not expose to temperatures exceeding 50°C. Keep away from heat / sparks / flames / hot surfaces. No Smoking. Do not spray onto an open flame or other ignition sources. Do not pierce or bum, even when empty. 100% by mass of the contents are flammable.

PACKAGING

350ml aerosol can.
